

KINDERGARTEN SUMMER LEARNING

Here are a few other ways to have fun learning at home:

1. The Tang Math website is a great resource for all things math. We would especially recommend the game found below, Ten Frame Mania.
2. <https://tangmath.com/tenframemania>
3. The Starfall website is fun to explore and covers all academic topics through games and videos. <https://www.starfall.com/h/index-kindergarten.php>
4. Make letter or number flashcards and hide them around the house for a scavenger hunt.
5. Take time to discuss the sounds you hear in words. What sounds do some of their favorite toys or foods begin with?
6. Read poems, books that rhyme, and nursery rhymes with your child.
7. Get outside and make some memories. This will give your child lots of story ideas to write about in Writers' Workshop in the Fall.
